WORK EXPERIENCE

Medibuddy

Bangalore, Karnataka

Software Development Engineer in Test

Oct 2024 - Jan 2025

- Built automated workflows using n8n to update bulk data into the database, reducing manual effort from 10–15 days to just 2–3 days. Monetized the MediBuddy platform by integrating targeted ad strategies and achieved 5% product revenue growth in three months by planning and launching four new key features, also improved state test pass rates from 60% to 73% in just 2 months.

SMIT Solutions

Pune, Maharashtra

React Developer

Apr 2023 - Jul 2023

- Worked as a frontend developer, gained hands-on experience with React.js fundamentals and Rest APIs data fetching using Axios. Built responsive and user-friendly interfaces for an E-Learning application, enhancing accessibility and user interaction.

PROJECTS

CompareWise - Shop Smarter

[view](#)

Technologies : Next.js, TailwindCSS, PostgreSql

- Implemented product discovery based on user-defined categories and budget, displaying results in intuitive card layouts with price, ratings, reviews and enhanced user experience with a clean UI, real-time filtering, and responsive design using React and Bootstrap.
- Integrated the project with the Gemini AI chatbot API to assist users with product queries, recommendations, and support, providing an interactive and intelligent shopping experience.
- Streamlined the shopping process by consolidating data from multiple sources to help users find the best value in a single view.

ManageMate - Employee Management Dashboard

[view](#)

Technologies : React.js, Bootstrap5, Material UI

- Organizes and centralizes employee records with a user-friendly, responsive interface.
- Monitors attendance, performance, and other key metrics in real-time for better decision-making.
- Boosts HR productivity with quick access to comprehensive workforce insights and actions.
