OBJECTIVE

Full Stack Developer focused on building fast, responsive, and optimized web applications. Passionate about clean code, scalable systems, and delivering seamless user experiences.

SKILLS

Languages: Javascript, Typescript, SQL

Technologies: HTML, CSS, Bootstrap, Tailwind, Material UI, ReactJS, NextJS, NodeJS, ExpressJS, MongoDB, PostgreSQL, Git, Github, SDLC

WORK EXPERIENCE

Medibuddy

Bangalore, Karnataka

Software Development Engineer in Test

Oct 2024 - Jan 2025

- Built automated workflows in n8n to streamline bulk data updates, significantly reducing manual effort from ten to fifteen days down to just two to three days. Monetized the MediBuddy platform by integrating intelligent ad targeting strategies, resulting in notable product revenue growth within a short span of three months.

SMIT Solutions

Pune, Maharashtra

React Developer

Apr 2023 - Jul 2023

- Worked as a frontend developer, gained hands-on experience with React.js fundamentals and Rest APIs data fetching using Axios. Built responsive and user-friendly interfaces for an E-Learning application, enhancing accessibility and user interaction.

PROJECTS

CompareWise - Shop Smarter

[Git Repo](#) | [Live Demo](#)

Technologies : Next.js, TailwindCSS, PostgreSQL

- Built a platform to help users discover and compare products from multiple e-commerce sources in one unified view.
- Optimized performance with debounced budget filtering for smooth, responsive product discovery.
- Enhanced user experience with Gemini AI integration for smart recommendations and query assistance.

ManageMate - Employee Management System

[Git Repo](#) | [Live Demo](#)

Technologies : React.js, Bootstrap5, Material UI

- Organizes and centralizes employee records with a user-friendly, responsive interface.
- Monitors attendance, performance, and other key metrics in real-time for better decision-making.
- Boosts HR productivity with quick access to comprehensive workforce insights and actions.
